**NASASPS Meeting, State Regulators, Sharing, State to State**

The following topics were discussed by the members. Highlights of the discussion are included:

- Transgressors across borders
  - Schools should be included in the website owner's name.
  - We could use our listserv and contact NASASPS members for information.
  - Only include information for public record.
  
- Predatory lending
  - A problem with lenders is that students go to other states for private lenders.
  - Identify other lenders that are growing up.
  
- Computertraining.com
  - If they come into your state, call Carol Buchanan.
  
- Website/listserv
  - We should migrate to a new listserv.
  - We should decide how many listservs we want.
  
- Third party lending
  - Students are getting private loans. Lenders go out after students when a school closes.
  
- Clarification of CompTIA presentation
  - CompTIA cannot approve any school; it's the state.
  
- Classification of schools
  - Utah has a kind of certification group.
